Why Pay More for Fishing Tackle To Be Reboxed Here In America?
Most fishing products sold here in America are now made in China. The quality for the price is unmatched. The secret with most lure companies is they try to hide this fact. These other companies either buy the products and repackage them here in the states to try and pass them off as Made in the USA or buy the parts and assemble them here in the USA. All this adds to an additional cost to you the consumer. Here at Chaser Lures we buy direct from China and offer you the highest quality lures, rods, reels and other tackle at an Unbeatable Savings! We pass the savings on to you! We are your direct connection to the highest quality Chinese made fishing tackle.
